The Art of Gambling

EUROPEAN CASINOS

The controversial Surrealist Salvador Dali was one of the most popular artists of the 20th century. While studying at the Madrid School of Fine Arts, he was intrigued by Cubism and simultaneously attracted to Impressionism and Futurism. But he became a full-fledged member of the Surrealist movement after meeting Picasso.

Following his reading of Sigmund Freud, Dali developed a passion for the study of the unconscious and the interpretation of dreams in his paintings. His artistic style exerted a strong influence on fashion and advertising during the eight years (1940-1948) he lived in the United States. Though his work and ideas continue to provoke disputatious discourse, Dali remains one of the most illustrious-artists of our time. Though both Picasso and Dali are Spanish, their interpretations of playing cards feature the French-style clubs (the Spanish equivalent is swords; the Spanish deck includes clubs, but they are literal clubs that correspond to the French spades).

Dali's card is splashier, incorporating some of the elements of a tarot card. The Cubists' preoccupation specifically with the ace of clubs is noteworthy: Compositions by Georges Braque and Juan Gris are also titled "Ace of Clubs" and the card is present in Picasso's "Card Players" and Gris "Playing Cards and a Glass of Beer".
