

## A REFERENCE FOR THE EUROPEAN GAMING INDUSTRY

Alfastreet headquarters in Slovenia

Pockaj Pohistvo d.o.o., owner of the Alfastreet brand entered the world's gaming and amusement market in 1997, with its first Alfastreet multiplayer electronic roulette.

Alfastreet sensed the rising opportunities, embarked on an ambitious development program focused on technology and design, and have been leading the pace ever since, with regular introductions of new models and types within the Alfastreet series of machines, all of which have rapidly become popular and are considered trustworthy and reliable by both operators and players.

Nowadays, Pockaj Pohistvo d.o.o. is one of the most innovative and fastest growing high-tech companies in Slovenia, providing world-class products for the gaming industry.

Main entrance to Alfastreet headquarters

*"Alfastreet has established itself as one of the key players in the growing multiplayer market. Alfastreet builds its multiplayer machines with both operators and players in mind. For the operator, we offer an extremely modular, versatile, easy to use, technologically advanced, highly secure and easy to maintain product. For the player, we offer attractive, easy to use and ergonomically shaped player stations. Alfastreet today has a very large family of multiplayer terminals that can cater to almost all market requirements. Our company produces a very comprehensive, technologically advanced and easy to use range of gaming machines. Alfastreet products are well known to operators for their excellent price/quality ratio", explained a company spokesman.*

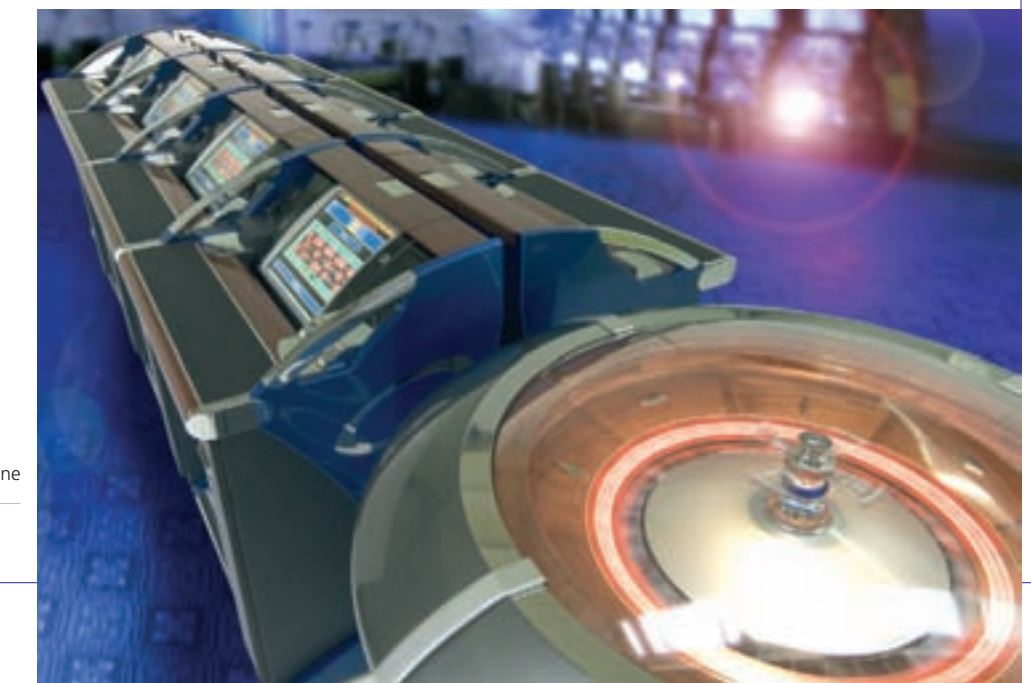

Today's range of Multiplayers produced by Alfastreet includes the following lines:  
 The R line. The R line covers classic Alfastreet roulettes that can be produced in 5, 6, 8 and up to 24 player configuration. The roulette features touch screen display, automatic and secure cash handling, the ticket in - ticket out (TITO) system and multi-denomination features. Up to 24 terminals can be connected to a single roulette wheel.  
 The M line. The M line is the evolution of the R line and is suited for Casinos that have more space concerns. The M line features double terminals that can easily be adapted to suit all gaming floors. Terminals are elegantly finished with wood and brass details. The M line is provided

New SL line

Another configuration of the new SL line

with stand-alone fully automated roulette wheels or live roulette wheels (new) and it is also possible to choose the all new Dice game. All action is captured live with a camera focused on the roulette or dice wheel and presented on a large screen display. Up to 24 terminals can be connected to a single roulette wheel.

The new SL and SG lines. Alfastreet stand-alone terminals have been specifically designed to cater to each Casino's individual floor-space and floor-design requirements. The modular design incorporates electronic player stations with touch screen displays, linked to a fully automated or live roulette wheel and can be also provided with the new Dice game. All action is captured live with a camera focused on the roulette or dice wheel and presented on a large screen display.

Individual terminal features touch screen display, automatic and secure cash handling, Ticket In - Ticket Out (TITO) and multi-denomination features. Up to 24 terminals can be connected to a single roulette wheel.

Alfastreet's TT terminals are another revolutionary product. Table Top is the smallest, most compact gaming terminal on the market, designed to cater each Casino's specific requirements and needs. Table Top incorporates electronic play station with touch screen display, linked to a fully automated or live roulette wheel. All action is captured with a camera focused on the automated or live wheel and presented on LCD screen displays. The terminal features touch-screen displays, automated cash handling, TITO and multi-denomination features. TT terminals can also be incorporated into an elegant table for lounge areas or specially designed Bar extension. TT Terminals can be also added to R, M, SL or SG line terminals and dramatically enhance revenue per square foot. Other new Alfastreet products feature the popular
