

SUCCESSFUL COOPERATION BETWEEN SMARTGAMES AND ARISTOCRAT

In April 2005 Aristocrat Leisure Limited signed an exclusive contract giving SmartGames the right to sell slot machines in Russia. The Russian company undertook to assist Aristocrat in significantly increasing overall unit sales in the Russian market. Distribution of the Australian machines was entrusted to Aurora, a 100% subsidiary of SmartGames.

Two years later, it is obvious that the deal has been a great success for both parties.

At the recent issue of ICE in London, the SmartGames team were very excited about the innovations on show at the stand of the European division of Aristocrat. An extended range of new XCite games together with a new PokerPro product attracted a lot of operators from all over the world.

"The Aristocrat stand was one of the highlights of ICE 2007. The new Zorro Link will obviously greatly contribute to the success of Aristocrat Jackpot family" said Lyubov Loginova, Commercial Director of SmartGames.

Ms Loginova paid special attention to the ACE Interactive VLTs with server based games, as a prospective new gaming industry trend, and to a business really close to one of the new SmartGames product lines - kiosk and terminal manufacture. She is convinced that these technologies will be a great success in Russia when they arrive.
